# Information about your staying

# Essentials

- Laptop
- Smartphone + earphones
- Swimwear
- Trainers or hiking shoes
- Slippers
- Technical gym shirt

**DON'T  
FORGET!**

# Trip to Norcia

**A bus will take you (students and teachers) from**

- Fiumicino airport to Norcia (21 of September)**
- Norcia to Fiumicino Airport (27 of September)**

**Fiumicino**  
200km from Norcia

Fiumicino Airport is located 200 km far from Norcia. Trip from/to the airport takes 2 hours and 30 minutes. The first option is 1) to take a train to Termini station, then 2) a train to Spoleto and finally 3) the bus E401 to P. Romana Norcia. Train timetables are available on [Trenitalia website](#) and bus timetables on [FSbusitalia website](#).

Alternatively, you can take a taxi.

**Breakfast, lunch and dinner are included in the room tariffs (students do not have to pay). At lunch and dinner only water is provided as a drink. Extras like coffee, wine or soft drinks must be paid.**

# Information about didactic activities

# CoWorking Lab

Co-working laboratories are conceived as moments of interdisciplinary design and planning between participants and experts and will be organized dividing participants in 5 teams each as diversified as possible in terms of competence and nationality. The aim of each team will be to define a «smart» proposal (technical, social, governance, etc. solutions) to tackle tourism issues in the case of Norcia municipality.

# International Integration

Each day, **from 7 to 8 p.m.**, the students, divided by university of origin, must present the language, traditions and curiosities of their country to the other participants (also with a power point).

# **Detailed Calendar**

21 September 19:00 - 20:00

## ITALY

The Italian students present their language, traditions, typical dishes, etc.

ISCiS Summer School Director

# Discovering the territory: Orienteering

The activity will be carried out by a qualified guide who will provide all the necessary equipment (compasses, maps, marker board and lanterns) before starting and will introduce the students to the ancient discipline of orienteering. The meaning of orienteering, how to use navigation tools, the technique of map orientation with magnetic north, azimuth and how to read a map will be explained. Using the tools provided, the students will have to find their way back. At the end, a ranking will be drawn up with the scores obtained.

**22 September 15:00 - 17:00**

*Smartness: definitions and indicators*

The lesson aims to introduce the concept of urban smartness, meaning the set of strategies and innovative solutions adopted by cities to become more efficient, sustainable, and inclusive through the use of digital technologies. In the first part of the session, we will explore the meaning of "smart city," illustrating its main dimensions: from smart mobility to citizen participation, from energy efficiency to digital governance. Subsequently, the focus will shift to the relationship between digitalization and urban tourism, through the analysis of concrete case studies—such as Barcelona, Amsterdam, and Singapore—to encourage a critical discussion on the various ways technology can influence the development of urban tourism.

# Territorial analysis

The students will work, helped by teachers, on the territorial analysis tools and methods in order to describe Norcia by considering one of the sets of the smartness indicators described in the first lecture.

*Role of smart tourism technology in cultural tourism*

Digital tools enhance the tourist experience and increase the attractiveness of the cultural heritage of the destination for both its residents and visitors. Personalised, context-aware and location-based information assists in the promotion of heritage attractions on the tourist market. Capitalizing on this can lead to Smart Tourism Destinations. The lecture focuses on Smart Tourism Technology (STT) attributes such as accessibility, informativeness, interactivity, and personalisation in digital communication of cultural attractions. It offers a short recognition of the published literature and selected case studies.

23 September 11:00 - 13:00

# Sara Ferretti

## University of Perugia

### *Personalization of the cultural experience*

The lecture aims to introduce university students to the use of large language models (LLMs) and the Retrieval-Augmented Generation (RAG) architecture as innovative tools for enhancing the value of historical and artistic heritage. In an era in which artificial intelligence is transforming the ways we access and interact with information, it is crucial to understand how these technologies can be applied in the cultural domain to increase accessibility, usability, and the personalization of content

23 September 15:00 - 17:00

# Cláudia Seabra

## University of Coimbra

*Smart and sustainable destinations. How to market and manage?*

The necessary balance between problems and potential may depend on monitoring processes and practices. Innovative proposals allow for an improved tourist experience, strengthening the local economy and active collaboration in urban planning.

In order to reach this balance is important to market and manage smart destinations in the best possible way to valorize urban cultural tourism and, at the same time, promote and find the best strategies to involve local communities and residents. Some benchmarking will help to see the best practices in historical and smart cities. The session will conclude with a practical exercise designed to help students ideate, promote and manage a smart city.

23 September 17:00 - 19:00

## Ideation

The students will work, helped by teachers, on the ideation of the tourism project for Norcia through:

- brainstorming on project idea characteristics
- technological solutions to be adopted
- stakeholders to be involved
- etc.

INTEGRATION**

**POLAND**

The Polish students present their language, traditions, typical dishes, etc.

# 24 September 09:00 - 13:00

## Discovering the territory: Rafting

The activity will help the students to look at the territory from a different point of view: the water. From the 'Rafting Umbria' venue in Serravalle di Norcia, you will embark on an easy rafting descent with all possible safety precautions. Corners of unspoilt nature will be explored and places that excite with their beauty, such as the Biselli gorges, will be discovered.

24 September 15:00 - 17:00

# Cláudia Seabra

## University of Coimbra

*Emotions and tourism: How to create memorable destinations?*

*There is an important connection between emotions and tourism experience that strongly impacts perceptions, satisfaction, and visitors' memories. As emotions are shaped by physiological, cognitive, and social processes, researchers are using several methods and perspectives to analyze how visitors "feel" and "perceive" their tourist experiences. Attention will be given to methods used to understand and measure emotions. To illustrate the application of these concepts, a case study at a UNESCO destination will be analyzed. The session will conclude with a practical exercise designed to assess visitors' emotional responses.*

24 September 17:00 - 19:00

# Paola De Salvo

## University of Perugia

### *Emotional Tourism*

We will explore how to create authentic and engaging tourist experiences, capable of activating emotions and deep connections with places. We will explore narrative, sensorial and relational approaches, interactively integrating tools and solutions that facilitate access, customization and enjoyment of the experience.

24 September 19:00 - 20:00

# SPAIN

The Spanish students present their language, traditions, typical dishes, etc.

25 September 09:00 - 11:00

# Carlos Pineda

## University of Murcia

### *Cultural Heritage and Technology*

It will be explained the importance of digital twins in cultural heritage from a management perspective, but also from a tourism and cultural promotion perspective. It will be presented some practical cases in which digital twins have helped in this regard.

25 September 11:00 - 13:00

**Marco Pizzi****University for Foreigners of Perugia***Digital visual methods for tourism strategies design*

In recent decades, it has become increasingly evident that the intangible factors of a territory are crucial to its economic development.

Furthermore, various communication theorists have argued that this type of asset is developed within the narrative that describes the territories themselves. This reflection finds clear applications in the tourism sector, where the storytelling of places is one of the main tools for the industry's growth. Within this framework, Participatory Place Branding is a set of theories and practices that can be studied through innovative research techniques such as visual content analysis. The lesson will be a journey through these concepts.

25 September 15:00 - 17:00

# Rosa Ramos Hildago

## University of Murcia

*Policies and governance for Smart Tourism*

"City branding" will make us understand a new way of selling an area to the public, digging in strategies planned from the government joining private sector to improve the competitiveness of a region or a city in terms of products, culture and consumption. We will explore how the digital transformation offers way more opportunities to share the product to the rest of the world.

25 September 17:00 - 19:00

# Development

The students will work, helped by teachers, on the development of the tourism project for Norcia through:

- In depth study of the project work characteristics
- Budgeting and economic sustainability

25 September 19:00 - 20:00

# PORTUGAL

The Portuguese students present their language, traditions, typical dishes, etc.

Presidenza del Consiglio dei Ministri

26 September 09:00 - 11:00

# Jamina Tatar Andelić

## University of Montenegro

*Translating Tourism in the Digital Era*

This lecture explores the crucial role of language and translation in enhancing the accessibility and attractiveness of tourism content for global audiences. It will analyze practices in the translation and localization of tourism websites, considering both linguistic strategies (e.g., tone, terminology, idiomatic expressions) and broader intercultural communication challenges. Participants will engage with real-world examples, evaluate translated tourism content, and collaboratively develop strategies for adapting digital materials to diverse cultural contexts.

**26 September 11:00 - 13:00**

# Communication

The students will work, helped by teachers, on the communication ways of the tourism project for Norcia through:

- Choice of the best software according to the project
- Focus on the main features of the project

26 September 15:00 - 18:00

# Project work presentation

The students will present their project in front of a panel of judges:

- Teachers
- Representatives of local companies
- Representatives of local institutions

**26 September 18:00 - 19:00**

# **Award ceremony**

It will be awarded the project most capable of interpreting the tourism needs of the Norcia municipality and responding to them with the most appropriate smart tools
